

0026 - Remove Duplicates from Sorted Array

LeetCode

```
class Solution {  
    public int removeDuplicates(int[] nums) {  
        int uniqueIndex = 1;  
  
        for(int i = 1; i < nums.length; i++){  
            // [ ][ ][ ][ ][ ][ ][ ][ ]          uniqueIndex [ ][ ][ ][ ]  
            if(nums[i] != nums[i - 1]){  
                nums[uniqueIndex] = nums[i];  
                uniqueIndex++;  
            }  
        }  
  
        return uniqueIndex;  
    }  
}
```
