- 
- The diagram illustrates the structure of a network packet, likely a TCP segment, with the following components and sizes:
- Header:** Consists of several fields:
    - Source Port: 2 bytes
    - Destination Port: 2 bytes
    - Sequence Number: 4 bytes
    - Offset: 2 bytes
    - Window Size: 2 bytes
    - Checksum: 2 bytes
    - Urgent Pointer: 2 bytes
    - Options: 0 bytes
  - Payload:** The data being transmitted, represented by a large block of 1024 bytes.
  - Footer:** Consists of a single byte, likely a padding or trailer byte.
- The total size of the packet is 1024 bytes, as indicated by the label "1024" at the bottom right.

-

- 
- A horizontal number line starting with a solid black dot at 0. To the right of the dot are 15 empty rectangular boxes, each representing a unit interval for counting.
